

BIOMÉRIEUX

Protect your brands.
Protect your customers.

PIONEERING DIAGNOSTICS

Protect your brands with quality-control and sterility-testing solutions from bioMérieux.

With so many points of potential contamination in dairy and beverage production, quality control is paramount. Your customers' safety—and your company's reputation—depend on knowing your raw materials, production environment, and finished products are free of pathogens and spoilage organisms. bioMérieux's microbiology testing solutions offer a rapid, streamlined workflow that improves your bottom line—and most importantly, delivers results you can count on.

RAPID, RELIABLE RESULTS YOU CAN COUNT ON.

The difference between an accurate test result and a flawed one can make the difference between business as usual and a production-stopping problem. The microbiology experts at bioMérieux engineer diagnostic solutions that deliver accurate results—on time, every time.

ACCURATE

- Protect your customers
- Identify issues efficiently
- Pinpoint production problems

RAPID

- Make decisions faster
- Reduce inventory costs
- Extend shelf life of product

STREAMLINED

- Intuitive workflow
- Built-in data traceability
- Low risk of sample contamination

BOOST PRODUCTIVITY AND CONTROL COSTS.

From in-process testing to environmental monitoring to finished goods, our streamlined solutions allow quicker decision-making at every stage of the manufacturing process—enabling valuable insights, faster corrective action, and more efficient product releases. And getting your product onto shelves in less time can lower inventory housing costs and extend shelf life, reducing waste and benefiting your bottom line.

UNLOCK VALUE WITH A STREAMLINED WORKFLOW.

Quality-control testing takes time, labor, and training. Minimizing all three of these—without compromising accuracy—can lead to significant savings. That's why all our testing solutions have intuitive interfaces and require no more than three steps. And with efficient validation and calibration processes for all our equipment, your lab can begin to reap the benefits almost immediately.

DATA INTEGRITY & COMPLIANCE MATTER.

To catalog meaningful data, your samples need to be protected from cross-contamination. With an intuitive, simplified workflow to protect sample integrity and built-in data traceability to keep your data within compliance standards, bioMérieux testing solutions are all LIMS-compatible to ensure your results are easy to access at a moment's notice.

CUSTOM SOLUTIONS WITH WORLD-CLASS SUPPORT.

Every lab and plant is different. Our team of microbiology experts specialize in customizing solutions to meet your facility's unique needs, and providing the support you need to make sure your quality-control solutions are keeping your business at its best.
